

Sturla Bragason.

Principal Platform & AI Engineer. Hands-on architect, methodical problem-solver, tactful diplomat.

◆ BASED IN COPENHAGEN ◆ AVAILABLE FOR ADVISORY ◆ CLOUD-NATIVE · AI · DEVOPS

For the past decade I have led my colleagues consistently to success as the go-to engineer and hands-on architect.

"I'm Winston Wolfe. I solve problems."

WINSTON WOLFE — PULP FICTION

01 /
Experience

Selected positions

2025—Now

Principal Platform & AI Engineer at Aeven

Designing Aeven's new hybrid-cloud platform with a team of engineers.

2020—2025

Principal Architect, Cloud / DevOps / AI at Devoteam

Built modern cloud platforms as code for enterprise clients.

2018—2020

Senior Consultant & Infrastructure Trainer at Omada

Deployed Omada's platform for clients and ran a monthly infrastructure course I wrote for partners.

2017—2018

Technical Consultant & Azure Specialist at Wise

Deployed Wise's platform on Azure and helped clients solve complex technical problems.

02 /
Approach

How I work

I am a cloud-native platform engineer focused on open-source best practices and vendor-neutral solutions. My approach to architecture is lean, uncluttered, and minimalist – so the whole team can manage it.

I use a divide-and-conquer style to break down complex backlogs into clear, actionable tasks. Any work I do creates tangible outcomes: code, diagrams, or documentation that ensure everyone knows exactly how to move forward.
